MY TIMELINE

Mom

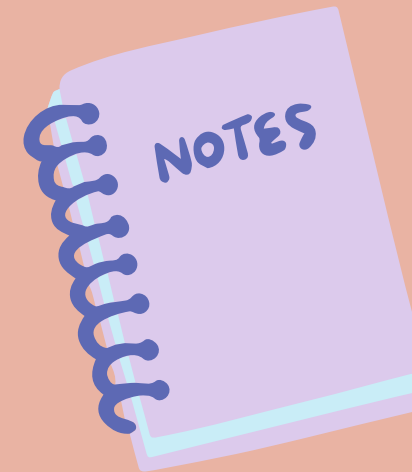

Elementary

Capstone

University

KAC

MY MOM

My mom is one of my greatest inspirations and biggest cheerleaders. She was a educator for more that 30 years and has shown me what it looks like to be a lifelong learner. I am very privileged to have a mom (and Dad!) that value education so much and prioritized my education.

ELEMENTARY SCHOOL

I loved everything about elementary school! I had wonderful friends and amazing teachers. I always felt safe and loved by my teachers which nurtured a love for school and learning.

CAPSTONE PROJECT

In grades 11 and 12 I had the opportunity to spend a few hours a week as a teacher's assistant in the kindergarten class at my school. I instantly loved it and I learned so much about teaching and classroom management. My school was also piloting an outdoor kindergarten program which I wrote my capstone project on.

BACHELOR OF ARTS

In April 2024 I graduated with a Bachelor of Arts in English. Even though my degree wasn't directly related directly to education I had opportunities to look at the education system and reflect on my own experience of education from a new perspective. I also learned how education can perpetuate inequalities.

KAC

In 2021 I started working at Kamloops Alliance Church as the Children's Ministry Coordinator. I learned so much in this role about building relationships with children and families, communicating with parents, and adapting when things don't go to plan. In this role, my "teacherness" was also affirmed by co-workers, parents, and volunteers. I left this position in July 2024 to focus on school full-time, but my time working at KAC stands out as a very influential moment in my education journey.

**THANK
YOU!**

Thanks for learning a bit about me.
